Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This office action is in response to communication filed on 9/17/2003.
2. Claims 1-7 are presented for examination.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-2, 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Carney et al. (6,408,278 hereinafter Carney).

With respect to claims 1-2 and 6, Carney teaches a merchandise system permitting participating merchants to place video or still-image advertisements at selected times and locations on a network of multiple electronic billboard displays, and permitting customers of the merchants to respond to the advertisements by placing orders for advertised products through an order processing system (Abstract).

A network including a plurality of electronic billboard displays (Figure 1, 14a-14n);

Means permitting participating merchants to place video or still-image advertisements at selected times on selected ones of the network's electronic billboard displays (Figure 9);

The advertisements on the displays including a unique product order number for each product offered for sale by the participating merchants (i.e. the user uses gathering device 32b to order products or services advertised);

An order processing system that permits customers to order products from the array of products offered by the participating merchants on the electronic billboard display advertisements, said order processing system including a customer interface for receiving incoming orders from customers ordering products by reference to the displayed product order numbers, means for matching each incoming product order to the customer placing the order, the product ordered and the participating merchant offering the product, and means for communicating sufficient customer and product information to the participating merchant so that the merchant can fulfill the order (see Figure 6).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3-5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carney.

Claims 3-4 further recites a telephone interface including identification means consisting of call no. ID and voice recognition. Official Notice is taken that it is old and well known to use caller's ID and voice recognition in order to easily identify the caller.

Art Unit: 3622

It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included call no. ID and voice recognition in order to achieve the above mentioned advantage.

Claims 5 and 7 further recite GPS means for determining the location of customers during the customer's placement of the orders. Official Notice is taken that it is old and well known to use GPS for determining an exact location. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included included GPS means for determining the location of customers during the customer's placement of the orders in order to determine the location that the user placed the order from.
